SUMMARY

Business Analyst and Computer Science (Honours) graduate of Universiti Teknologi PETRONAS, Second Class Upper, majoring in Enterprise Systems. At Axrail I turn business processes into clear requirements for data and generative-AI solutions, working with clients across banking, insurance, logistics, telecommunications and SMEs. I also evaluate large language model outputs for Handshake AI, and build working software in my own time, including a data dashboard used daily by around 150 teachers. Structured, detail-oriented and comfortable moving between business stakeholders and technical teams.

PROFESSIONAL EXPERIENCE

Business Analyst Oct 2026 - Present
Axrail Sdn Bhd | Kuala Lumpur, Malaysia

- **Delivering AI and data solutions for a client portfolio spanning banks, insurers, logistics and telecommunications companies, and SMEs**, translating each industry's processes and data into clear requirements.
- **Analysing requirements for a generative-AI document-processing portal** for a banking client, covering AI extraction and cross-checking of loan documents, approval flows and maker-checker review; maintaining an issue and requirements tracker against the functional specification.
- **Judging where AI output meets existing systems**, identifying human-intervention points, edge cases, audit-trail gaps and conflicts between specification and implementation, and raising them with owners until resolved.
- **Supported an AI discovery workshop for an insurance client**, scoping use cases on structured canvases (problem, current process, volumes, pain points, data, what stays with people, success measures) to shortlist a proof of concept.

AI Model Evaluator (Freelance) Oct 2026 - Present
Handshake AI | Remote

- **Evaluate and compare large language model responses side by side** against detailed quality rubrics, judging accuracy, instruction-following, helpfulness and safety, and writing a clear rationale for each judgment.
- **Apply evaluation guidelines consistently to ambiguous and borderline cases**, producing human preference data used to train and improve foundation models.

Digital IT Operations Intern Jan 2025 - Aug 2025
SLB (Schlumberger) | Chukai, Terengganu, Malaysia

- **Designed and built an IT Asset Disposal app end to end** on Microsoft Power Apps, SharePoint and Power Automate, replacing fragmented email-and-spreadsheet tracking with one centralised, searchable disposal platform for SLB Malaysia.
- **Engineered an in-app three-tier approval workflow** with role-based access (Requestor, IT Manager, Finance Controller) and automated email notifications via Power Automate, improving traceability and auditability.
- **Modelled the data architecture to 3NF** across two linked SharePoint lists (disposal cases and line-items), standardising the data captured per item (asset type, tag, serial number, brand, model, quantity).
- **Delivered a working prototype deployed internally**, built with GoDigital developers in an Agile scrum team.

PROJECTS

SMK Subang Data Dashboard - School Data Hub 2026
Side project, in daily use by ~150 teachers | github.com/7YMERA/dashboard-smksubang-portfolio

- **Replaced a page of links and a messy spreadsheet with one live data hub** for a Selangor secondary school, syncing hourly from Google Sheets and automatically flagging bad rows before they reach the dashboard.
- **Built privacy and accountability in from the start**: public view shows totals only, with row-level security, an append-only audit log, and one-time admin invite links instead of shared passwords (Next.js, Express, Supabase, Apps Script).

JumaatFinder - Friday Prayer Location & Timing App 2026
Side project | github.com/7YMERA/jumaat-finder-app

- **Built a 565-location dataset** by scraping 452 masjid and 113 surau from official JAIS listings, geocoding them and reconciling against OpenStreetMap, with a "leave by" time for each location from JAKIM prayer times.

- **Added community verification of uncertain records**, letting users confirm which surau hold Friday prayers, protected by rate limits and hashed IPs (Python, Neon Postgres, Leaflet).

TaskMatch - Skill-Task Matching Platform (FYP and v2 rebuild) Jan 2026 - Present

UTP Final Year Project (A-, B+), now personal | *github.com/7YMERA/taskmatch-v2* | *taskmatch-umber.vercel.app*

- **Built a recommendation system that matches project tasks to proven skills**, with an explainable fit score out of 100 (skills, experience, availability, track record) whose weights tune themselves from real outcomes.
- **Rebuilt it to production standard with AI coding tools** (Claude, Kiro) across 13 documented releases: verified login on every endpoint, row-level security, an audit trail, GitHub/Jira import, and pytest with GitHub Actions CI (Next.js, FastAPI, Supabase).

LEADERSHIP & ACTIVITIES

Head of Department, Academic & Welfare Jan 2024 - May 2024

UTP Computer & Information Sciences Student Society (UCISSS)

- **Led the Academic & Welfare department**: authored the department action plan, launched a coding-competition committee, a tech guest-speaker series and the society's website, and organised a Tesla Experience Centre visit for 42 students.

Vice President Sept 2023 - Jan 2024

UTP Griffin Esports Club | *Universiti Teknologi PETRONAS*

- **Organised and hosted student esports tournaments** that built engagement and generated revenue for the club, while growing membership by 15% across the player and management divisions.

EDUCATION

Bachelor of Computer Science (Hons) - Second Class Upper May 2023 - Aug 2026

Universiti Teknologi PETRONAS | *CGPA 3.23*

- **MARA Young Talent Development Programme (YTP) scholar** - merit-based national sponsorship (2022).
- **Major in Enterprise Systems, minor in Corporate Management.** FYP I A-, FYP II B+, Industrial Project A-.

Foundation in Computer Science - *Universiti Teknologi PETRONAS (CGPA 3.04)* May 2022 - May 2023

Secondary Education (Science Stream) - *SBPI Kuantan (INTEK)* SPM 2021: 9A's (3A+, 5A, 1A-)

RELEVANT COURSEWORK

Systems & Data: Enterprise Systems Development (A-), Business Intelligence, Data Science, Database & Information Management, Strategic Business Analytics

Computing: Artificial Intelligence (A-), Computer Systems (A), Discrete Mathematics (A), Algorithms & Data Structures, Software Engineering & HCI

Governance & Ethics: IT Audit & Risk Management (A-), Integrity & Anti-Corruption (A-), Computer Security, Data Communication & Networks

Business & Communication: Strategic Management, Organisational Behaviour, Entrepreneurship, E-Marketing (A), Professional Communication (A-)

CERTIFICATIONS & TRAINING

Verify badges: skillsprofile.skillbuilder.aws/user/najmi

- **Introduction to Amazon Bedrock: Foundation Models and AI Applications** - Amazon Web Services (AWS) | Oct 2026
- **AWS Partner: Sales Accreditation (Business)** - Amazon Web Services (AWS) | Oct 2026
- **AWS Academy Graduate - Cloud Foundations** - Amazon Web Services (AWS) | Aug 2026
- **Strategic Management** - Udemy | Oct 2025
- **HSE & Line Safety Training and Health, Safety & Environment (NEST) training** - SLB | Jan 2025

SKILLS & ADDITIONAL INFORMATION

Business Analysis: requirements elicitation, functional specifications (FRD/FSD), gap and issue tracking, process mapping, AI use-case discovery

AI & Data Quality: LLM output evaluation and side-by-side comparison, rubric-based judgment, edge-case and borderline-case analysis, issue tracking and root-cause follow-up; daily use of Claude, ChatGPT, Gemini and Amazon Bedrock

Data & Tools: Microsoft Excel, SQL, PostgreSQL / Supabase, Oracle, data modelling (3NF), Microsoft Power BI, data visualisation, Power Platform, SharePoint

Programming & Web: Python, Java, JavaScript / TypeScript, R, C++; Next.js, React, FastAPI, REST APIs, Git, GitHub Actions CI, pytest; AWS

Languages: English (native; CEFR C1), Malay (native), Indonesian (professional working proficiency), French (elementary), Mandarin (elementary)

Awards & Competitions: Mobile Legends 1st (2023), 2nd (2025); OH MY CODE! Competition 11.0, UTP (2022).
